

## ASSESSMENT # 4

Total Marks: 30

1. Give short answers for the following questions: (15)
  - i. What are the objectives of computer forensics?
  - ii. What happens if computer forensics is ignored or practiced badly?
  - iii. Who may be involved in computer forensics in an organisation?
2. Why is it important to report cyber-crime to the relevant authorities? Why may some organisations choose not to report a cyber-crime upon its detection? (8)
3. List and explain the initial incident management processes implemented, upon detecting a suspected cyber-crime in an organisational setting. (7)
