

Project Integration Management

ASSESSMENT # 4

Total Marks: 30

1. Give brief answers for the following questions: (14)
 - i. Where is project's plan used? Which type of information does it contain?
 - ii. Briefly describe the type of information that is contained in a stakeholder analysis document.
 - iii. Outline the main objectives of the integrated change control process.
 - iv. What are the major tools and techniques that assist managing integrated change control process?
 - v. Briefly describe the outputs of integrated change control process.
 - vi. What is a 'work break down structure (WBS)?'
 - vii. What are the outputs of projects' plan development?
2. "Project integration management means tying together all of the other aspects involved in a project to make it a success." Discuss this. (5)
3. Describe the processes involved in project integration management. (5)

Activity (6)

Identify a project that you would like to carry out in your particular field. It could be either a consultation project or a change project.

Factors to consider in selecting an appropriate project are as follows:

- a. What problems and opportunities are you facing at work?
- b. What processes in your work area are creating barriers or impeding the quality of the services or products you and your department provide to others?
- c. What aspects of your work are you particularly interested in?
